The train remains stationary at Cape Town station for the night.

DAY 01 and DAY 02 - CAPE TOWN

(Please Note: The order in which the below activities are executed depends on the weather, but will be covered in Day 1 and 2).

Should you only arrive at Cape Town International Airport today, you will be met upon arrival and transferred to the train. Please note that you should arrive no later than 08:00 at the airport in order to participate in the day's excursions.

Cape Town is considered one of the most beautiful cities in the world with Table Mountain dominating its skyline.

Cape Point

We will visit the Kirstenbosch Botanical Gardens, which are world-renowned for the beauty and diversity of the Cape flora and for the magnificent setting against the eastern slopes of Table Mountain. The estate of 528 hectares supports a diverse fynbos flora and natural forest. This is followed by a visit to Hout Bay, where a large fleet of colourful fishing vessels enhance the bustling ambience of this attractive resort. Fresh seafood is a speciality at Mariner's Wharf. Chapman's Peak Drive is one of the most spectacular sea cliff routes in the world. It was built between 1915 and 1922 and recently upgraded. We follow this drive to Simon's Town. In years gone by, sailing fleets from Europe soon discovered that Table Bay was extremely dangerous during the winter months. While exploring, Governor Simon van der Stel discovered the bay, which could give safe anchor to the visiting sailing ships during winter. Simon's Town is a charming little coastal town. It became a naval base in 1814 and is home to the SA Navy today. A visit to the Boulder's Penguin Colony will form part of this option as well. In 1983 a pair of African Penguins was spotted on Foxy Beach at Boulders and in 1985 they began to lay eggs. Since then the colony has grown rapidly, increasing initially at about 60% a year. By 1997 there were 2 350 adult birds. They are remarkably untroubled by people and Boulders is the only place in the world where one can actually swim amongst the penguins. This day will not be complete without a visit to the Cape of Good Hope Nature Reserve. Sir Francis Drake called it "the fairest cape in the whole circumference of the earth". Yet many vessels, wrecked by the turbulent seas, have found their resting-place along this rocky coastline. The Nature Reserve is situated at the southern tip of the peninsula. The 7 675 hectare reserve is filled with priceless indigenous flora and fauna, some 2 700 species of indigenous plants and over 250 species of birds as well as troops of baboons and many species of antelope. (Full day; distance traveled: ± 150 km).

Cape Town City Tour

Our city tour will commence with an exhilarating cable car ascent of Table Mountain (weather permitting and at your own cost). It provides breathtaking views over the city and its beaches. The panorama stretches from Table Bay to False Bay and around the mountain to the Hottentots Holland Mountains. The mountain is home to over 1 500 species of plants, many of these are found nowhere else on earth. Our city tour continues with a walk through the Company Gardens, followed by a visit to the Bo-Kaap Museum. The first Malays arrived in the Cape as political refugees and slaves during the 17th century. Nearly two centuries later after emancipation, these Islamic people moved into the area known today as the Bo-Kaap, building mosques with picturesque minarets and their own style Georgian houses with Dutch influence. One of the oldest Cape Town buildings houses the museum. It is furnished as a Muslim house of the 19th century and documents the history of the Cape Malays. On our way to the Victoria & Alfred Waterfront, we will stop at Diamond Works, where you will follow a tour of the diamond cutting studio, a jewellery manufacturing workshop, a jewellery design studio as well as a gemmological laboratory. Our lunch stop (guests' own account) will be at the Victoria & Alfred Waterfront, a development that has brought new life to the old harbor of the Dutch East India Company in Table Bay. The complex offers shops, craft markets, restaurants, taverns, cinemas, theatres as well as delightful views over the

harbor. In the afternoon we will drive through District 6. By 1900 the largest group of people then referred to as "Malay", "Mixed and other" or "Coloured" lived in poor conditions here. Yet the area was vibrant and full of colour with busy streets and vivacious lifestyles. Various religions and cultural heritages flourished and mingled. In the 40s the Apartheid government removed the residents and most of the buildings. Today the city still grapples with the problem of what to do with this valuable real estate, but also with how to deal with the strong emotions that still charge the issue. We end our city tour with a visit to the Castle of Good Hope, the oldest surviving building in South Africa. This pentagonal fortification replaced a small clay and timber fort built by Commander Jan van Riebeeck in 1652 as a maritime replenishment station for the ships of the Dutch East India Company. The stone walls between the bastions are 150 m long and 12 m high. (Full day; distance traveled: ± 100 km).

1. The Cradle of Humankind: Maropeng and Sterkfontein Caves

NB: This Tour departs the train at 09:30 (MIN 4 PAX).

The Cradle of Humankind developments (the Maropeng Visitor Centre and Sterkfontein Caves) are a Blue IQ initiative. Our visit will start at Maropeng (Setswana for "returning to the place of origin"), the visitor centre at the Cradle of Humankind. An exciting 4-billion-years journey through the elemental forces - water and ice, air, fire and earth - is simulated on an underground lake. One emerges at the beginning of the world after dipping through waterfalls and icebergs, into the eye of a storm, past erupting volcanoes

and through the depths of the earth. The journey continues through an experience that highlights the history of our world and humankind as a species. Real fossils are also on display. We continue on for a visit to the Sterkfontein Caves, 10 km away, most famous for the two world-renowned hominid finds, namely Mrs Ples in 1947 and Little Foot in 1997. Since excavations at the site first began, hundreds of hominid fossils as well as stone tools have been found here. The excavation of Little Foot and other fossils is an ongoing process at this still active fossil dig. The scientific exhibition here includes lifelike models of hominids as well as specific finds such as Mrs Ples, the Taung Child and Little Foot..
